SUMMARY

- 5 years of professional experience in backend development, specializing in scalable and efficient server-side applications.
- Proficient in **Node.js**, **Express.js**, **MongoDB**, and **MySQL** for developing robust backend systems.
- Strong experience in designing **RESTful APIs**, implementing **server-side logic**, and integrating backend services with frontend applications.
- Skilled in **AWS** for application hosting, deployment, and infrastructure management to ensure performance, scalability, and uptime.
- Competent in **database schema design**, **query optimization**, and **performance tuning** for both SQL and NoSQL databases.
- Experienced in using **Git** and **GitHub** for version control, collaboration, and codebase management.
- Familiar with **React.js** and capable of contributing to frontend features when needed.
- Committed to writing clean, maintainable code with a focus on testing, debugging, and continuous improvement.

EXPERIENCE

Node.js Developer

Global Infotech Private Limited

January 2023 - Present, New Delhi

Backend Developer

Beta Technology Private Limited

August 2021 - December 2022, Remote

Backend Developer

Z to A IT Solutions Private Limited

May 2020 - July 2021, Remote

Node.js Developer Intern

S.R. Web Solutions Private Limited

December 2019 - March 2020, New Delhi

Java Developer Intern

APS Mind Private Limited

May 2019 - July 2019, New Delhi

PROJECT

Aviation Application

- Developed backend services using Node.js and MongoDB to manage flight data, bookings, and real-time updates for efficient data processing and storage.
- Implemented RESTful APIs for flight scheduling, booking management, and real-time notifications to enable seamless integration with frontend and third-party services.
- Utilized MongoDB to handle and store large volumes of flight-related data securely.
- Deployed the application on AWS to achieve high availability and scalability.
- Leveraged AWS cloud services to ensure secure handling of sensitive aviation data and optimize system performance.

Commercial Transaction (B2B)

- Built and deployed a B2B backend system using Node.js and MySQL, focusing on efficiency.
- Utilized AWS infrastructure to ensure high performance and reliable operation.
- Developed RESTful APIs to facilitate seamless data integration.
- Enhanced client interactions by implementing robust and efficient API endpoints.
- Optimized uptime and scalability through AWS cloud solutions.

Yoga Application

- Developed backend services using Node.js and MySQL to efficiently manage user data, class schedules, and subscription plans.
- Created RESTful APIs for user registration, login, and booking classes to facilitate smooth communication between frontend and backend components.
- Deployed the application on AWS to ensure high availability and scalability.
- Leveraged AWS cloud services for performance monitoring, enhancing system stability.
- Utilized secure AWS data storage to maintain data integrity and protect user information.

Retail Store Application

- Built and maintained backend services using Node.js and MySQL to efficiently manage product catalogs, inventory, and customer orders.
- Developed RESTful APIs for product management, enabling smooth handling of product listings and updates.
- Created APIs for order processing and managing customer accounts to enhance user experience and ensure reliability.

- Deployed the application on AWS to leverage cloud infrastructure for scalable performance.
- Implemented secure payment processing and robust data management using AWS services.

Messaging Application

- Developed a full-stack messaging application using React.js, Node.js, and MySQL for real-time messaging and user interactions.
- Implemented user authentication and role management to control access and permissions within the application.
- Created RESTful APIs for message sending, retrieval, and user management to enable secure communication between frontend and backend components.
- Deployed the application on AWS to ensure scalability and reliable data storage.
- Utilized AWS cloud services for performance monitoring and maintaining high availability.

EDUCATION

Bachelor of Computer Applications

Guru Gobind Singh Indraprastha University • New Delhi • 2020

XII

Central Board of Secondary Education • New Delhi • 2017

X

Central Board of Secondary Education • New Delhi • 2015

SKILLS

Frontend: HTML, CSS, JavaScript, React.js

Backend: Node.js

Frameworks & Libraries: Express.js

Databases: MySQL and NoSQL

Cloud & Deployment: AWS (Amazon Web Services)

Version Control: Git and GitHub
